**Brief about your Business/Products:** The ELEKTRISOLA Group has been manufacturing wires since 1948, founded by Dr. Gerd Schildbach in Eckenhausen, Germany. ELEKTRISOLA is a global producer of fine magnet wires with 9 plants in the 3 most important continents for the automotive and electrical industry using same state-of-the-art machines to produce the same high quality wires.

ELEKTRISOLA supplies a wide range of high frequency litz wires, taped Litz wires and enamelled copper wire which are the core materials of several electric vehicle (EV) components:

- On-board charger (OBC)
- DC/DC converter
- Wireless charger (WC)
- Charging station (Piles)
- Electric traction motor
- EV relays
- Micro motor

ELEKTRISOLA involved early partnership in the development of innovative EV components, hence becoming a market leader to many multinational companies as their key tier suppliers.
