Brief about your Business/Products:
(In 200 words)

BAE Systems, a leader in electric propulsion, brings the next-generation of power & propulsion technology to the heavy-duty vehicle market. We have been delivering commercial vehicle electrification successfully for more than 25 years and are powering more than 15,000 vehicles around the globe. We achieved this with our proven system design methodology. Our power electronics deliver multifunctional capabilities in a power dense & flexible design. Our biggest strength is that with modular & scalable design, we are able to customize each vehicle solution. Creating a compact, lightweight system with fewer components & less wires increases electrical efficiency.
