Brief about your Business/Products: Parker Lord leverage nearly 100 years of experience in manufacturing and developing adhesives, coatings, thermal management materials, motion management devices and sensing technologies that significantly reduce risk and improve performance. Parker Lord's CoolTherm thermal management portfolio is recognized for reliability and custom solutions for use in electric vehicles, energy storage systems, motors, and other power electronics. CoolTherm solutions increase performance, reliability, and safety while delivering tailored products to manage heat and increase power density in electric vehicles. These products boast high thermal conductivity and low viscosity, which lends itself to a variety of product applications.
